MuxRelay_v4

```
//This includes 2 LEDs in order to show wich channel i

#define CH1 7 // Connect Digital Pin 7 on Arduino to
#define CH2 8 // Connect Digital Pin 8 on Arduino to

#define LEDCH1 11
#define LEDCH2 12

String comando1 = "CLOCK1";
String comando2 = "CLOCK2";
String comando3 = "AUTO";
String channel = "CLOCK1";

int led = 13;
int flag = 1;

unsigned long previousMillis = 0; // will store
const long interval = 10000; // interval at

void setup(){
  //Setup all the Arduino Pins
  pinMode(CH1, OUTPUT);

```

1 Arduino Uno on /dev/ttyUSB0
